Project Documentation

Project Overview
The project developed is SpiderMonkeys Law Firm. SpiderMonkeys Law Firm allows clients in need of legal assistance to browse available lawyers, gain information on the firm itself and view the firm's areas of practice and expertise. Oftentimes possible clients face the hassle of calling or physically going to a law firm to explore their legal options which can be an inconvenience considering that they have to deal with a legal issue in itself. This new solution for SpiderMonkeys Law Firm allows their clients to receive the necessary information about the firm they are putting their trust in at their leisure.

Project Team Description
Joshua Singh

- Pages -

- About
- Home
- Contact

- Posts
  - Cases
  - News

- Attorney
  - Name
  - Designation
  - Practice Area
  - About:- (About me, Experience, Education, Achievements)

- Testimonials

Website Design

Theme: FEXA

Popularity: ★★★★☆

URL link: *http://themebeer.com/wp/fexa/?storefront=envato-elements*

Rationale for choice:
This design was chosen as it is sleek, easily understood and cohesive which makes it attractive and eye catching. Everything that was needed is included in this selected design and it is understandable for potential clientele.

Functionality
- Search - A user can enter anything in the search bar any results that match will be displayed.
- User Roles - Administrator, Editor, Subscriber
- Blog/News - The website is updated with news relating to law.
- Forms - A contact form is used to get in touch with attorneys.
- Map - A user is able to locate the firm using an online map.
